Skills

UX Research: Usability Testing, User Interviews, Surveys, A/B Testing, Competitive Analysis, Heuristic Evaluation, Card Sorting, Affinity Mapping, Contextual Inquiry

Design: Wireframing, Prototyping, Interaction Design, Information Architecture, User Flows, UI Design, Responsive Web Design, Design Systems, Sitemaps, Accessibility (WCAG), Style Guides

Tools: Figma, Sketch, Axure, Miro, Maze, Confluence

Technical: HTML, CSS, JavaScript (basic)

Experience

UX Designer and Product Owner, DePaul ID Lab – USA

June 2024 – Present

- Conducted usability testing for HCSC (parent of BCBS) to evaluate whether AI-driven products meet user needs.
- Designed wireframes and prototypes of AI products to optimize workflows and enhance interactive experiences.
- Collaborated with cross-functional teams to align design decisions with user needs and measurable business goals.
- Directed a team of 2 designers to develop the ODi Conference brand identity, ensuring consistency across all channels.
- Worked with developers to create and maintain the ODi Conference website, ensuring alignment with the established brand identity and user experience standards.

Senior UX Designer, TA Digital (now Credera) – India

November 2021 – December 2022

- Introduced and established a scalable design system by transforming documentation into a structured library of reusable components with clear usage guidelines.
- Documented and advocated for adopting the design system across teams, standardizing design practices, and improving efficiency in design workflows.
- Led a team of 2 designers to redesign the ACS website, improving visual consistency, accessibility, and overall user experience while effectively presenting design solutions to stakeholders.
- Designed the user interface of CPS-3 HEALED, an application for studying cancer survivors' lifestyles, incorporating rapid prototyping and interactive design techniques.

UI/UX Designer, Tata Consultancy Services – India

October 2016 – October 2021

Intel – UX Designer

- Conducted user research through surveys to understand user behavior and identify usability challenges within the Learning Management System (LMS).
- Performed a UX audit of the existing platform, evaluating user flows, interface consistency, and usability issues to identify key areas for improvement.
- Led a team of 2 designers in developing wireframes and interactive prototypes, resulting in improved navigation and streamlined task flows.

ICICI Bank – Interaction and UI Designer

- Worked with business analysts and client stakeholders to gather and clarify requirements, translating business needs into practical design solutions.
- Created wireframes and high-fidelity UI designs for a banking application, ensuring visual clarity, consistency, and a seamless user experience.
- Partnered with developers to ensure accurate design implementation by providing assets, specs, and guidance during development.

Ericsson – UI/UX Designer

- Designed a dashboard application, enhancing access to key data and improving task efficiency.
- Conducted usability testing to improve design solutions, aligning them with user and business goals.
- Facilitated a design thinking workshop, guiding stakeholders on adopting a user-centered design process into their workflow to improve product development and user experience.

Education

DePaul University, USA – Master of Science in Human-Computer Interaction (HCI) (GPA: 3.93)

March 2025

Medicaps University, India – Bachelor of Engineering in Computer Science

June 2016
